Our services

Engineering

**New construction, conversion or deconstruction?
We can do it all for you!**

We'll plan your project from A to Z
and make sure that everything goes smoothly.
We'll find the right balance between deadlines,
budget and quality.

If it's tested and approved by us, it's safe.

Our services for your project:

- Design
- Construction supervision
- Project management
- Validation and Assessment

Integrated engineering and implementation
using **building
information modeling**

In-house lab
for sample analysis

Aerial images taken by
multicopter

Modern surveying systems
such as **3D laser scanning**

Our services

Engineering

We rely on innovative methods and
have the right expertise even for
special tasks.

Georadar
for non-destructive testing
down to 4 meters

Geotechnical monitoring for continuous monitoring
of structures and the surrounding geology

Our services

Consulting

We make you a success!

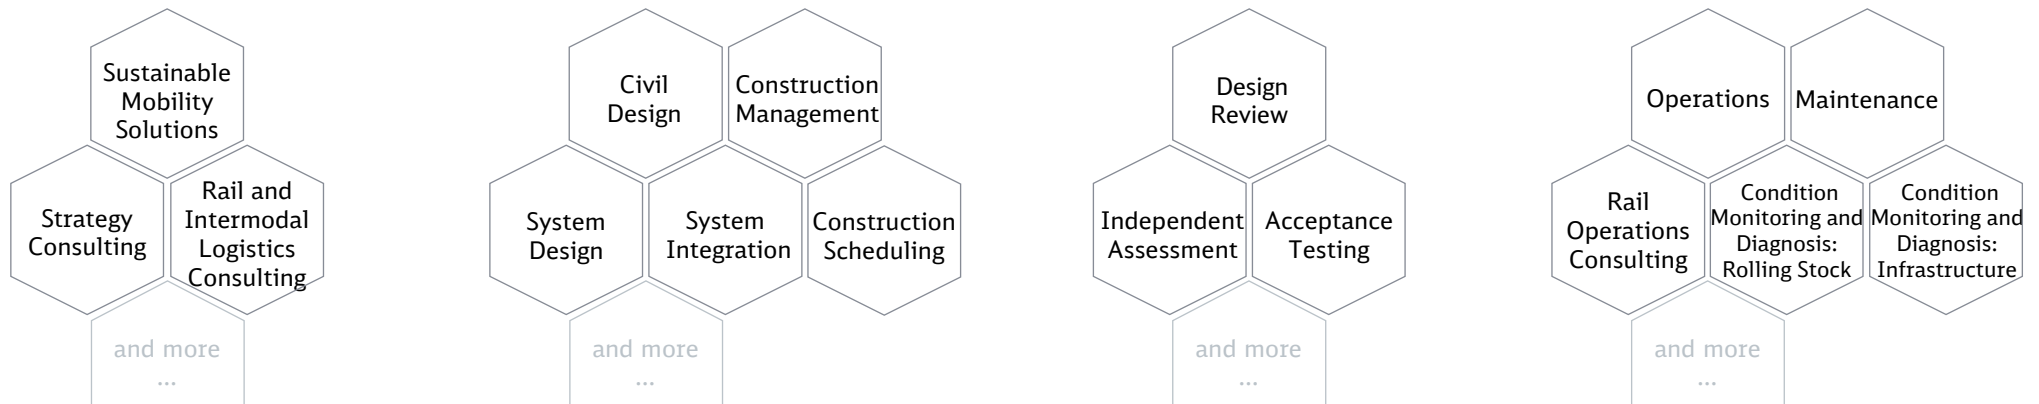

We advise organizations and companies in all matters relating to infrastructure, mobility and logistics. We analyze strategic and operational requirements and find the right solutions.

Our services for your project:

- Mobility and Logistics Consulting
- Digital Services and Solutions

Our services

Customized products for every life cycle phase
